

We have our very own Independent Nurse Prescriber with over 17 years of experience in the aesthetic field.

Offering advanced skin treatments to assist with ageing skin, sagginess lines and wrinkles, acne, acne scarring and pigmentation.

Dermal Filler Treatments

Dermal fillers are used to soften and contour lines, folds and wrinkles. The most commonly used are hyaluronic based. The solution is injected into the skin to add volume and create a more youthful appearance.

Dermal fillers are ideal for softening deep lines from the nose to mouth area, lip lines, enhancing thin lips or creating a more defined lip line and to lift the corners of the mouth.

Muscle Relaxing Treatments

By using facial muscles repeatedly throughout our lifetime, the skin is creased in areas of greatest use.

The ageing process causes the loss of collagen and elastin production in the skin so that as we get older these areas of over use become damaged and the lines become permanent.

Botox treatment reduces movement of the underlying muscles in these areas and the skin stops creasing and is allowed to recover causing the lines to soften or even fade away.
